Covid-19 RT-PCR

| Test Name | Result | Reference Range |
|----------------------|----------|-----------------|
| SARS-COV-2 BY RT-PCR | NEGATIVE | NEGATIVE |

SARS-CoV-2 BY RT-PCR, this is a RT (Real Time) PCR test method. This test should be ordered for the detection of the 2019 novel Coronavirus SARS-CoV-2 in individuals who meet SARS-CoV-2 clinical and/or epidemiological

diagnostic use under the FDA Emergency Use Authorization (EUA) for laboratories certified under CLIA to perform high complexity tests. Negative results do not preclude SARS-CoV-2 infection and should not be used as the sole basis for patient management decisions. Negative results must be combined with clinical observations, patient history, and epidemiological information.
